San Diego team wins $1.7 million grant from stem cell agency to develop quality control methods

SCRIPPS RESEARCH INSTITUTE

LA JOLLA, CA - January 29, 2015 - A team at The Scripps Research Institute (TSRI) has won a $1,784,000 grant from the California Institute for Regenerative Medicine (CIRM). The funding will support the development of a new method for detecting
The Scripps Research Institute (TSRI) is one of the world's largest independent, not-for-profit organizations focusing on research in the biomedical sciences. TSRI is internationally recognized for its contributions to science and health, including its role in laying the foundation for new treatments for cancer, rheumatoid arthritis, hemophilia, and other diseases. An institution that evolved from the Scripps Metabolic Clinic founded by philanthropist Ellen Browning Scripps in 1924, the institute now employs about 3,000 people on its campuses in La Jolla, CA, and Jupiter, FL, where its renowned scientists--including two Nobel laureates--work toward their next discoveries. The institute's graduate program, which awards PhD degrees in biology and chemistry, ranks among the top ten of its kind in the nation.
