LOCAL HIGH SCHOOL SCIENCE STUDENTS ATTEND SCRIPPS CLINIC PROGRAM

LA JOLLA, CALIF. March 27, 1991 -- Local high school science students were among nearly 200 teenagers who attended a special program March 2 about the origins and treatment of cancer.

Held at Scripps Clinic and Research Foundation and sponsored by the Charter Society of Scripps Clinic, the "Young Scientist Lecture Series" was designed to expose promising high school students to the challenges of scientific thought and medicine in the hope it will cultivate a desire to pursue a career in medical science or a related field. The program is offered annually and focuses on a special topic.

This year's symposium topic, "Perspectives on the Origin and Treatment of Malignancy," included lectures by Scripps Clinic physicians and researchers, and tours of the Ida M. and Cecil H. Green Cancer Center.

Local students attending the program were:

Southwest High School -- Elaine Bactad, Jorge Arangure, Ferlyvil Macayran, and teacher Steven Lizarraga;

Montgomery High School -- Christine Wainwright, Priscilla Villanueva, Michelynn Deona, Grace Kovach, and teacher Jean Bacon;
Marian High School -- Marianne Gorsich and Arthur Gilbert;
Chula Vista High School -- Guillermo Camblor, Theresa
Kinemon, Tam Le, Chang Lee, and teacher Steve Rodecker;
Bonita Vista High School -- Aida Bullen, Carrie Clark, Lisa
Castaneda, Rob Shifter, Craig Emery and Ken Tomino;
Mt. Miguel High School -- John Manning, Dave Jucko, Sally
Buchannan, Malcolm Robinson, Michelle Hubbard and Charlotte
Sanabria.
