The Scripps Research Institute (TSRI) was established in 1961. Its headquarters are located in La Jolla, California. It is a world-renowned independent non-profit biomedical research organization. TSRI is internationally recognized for their discoveries in immunology, molecular and cellular and biology neurosciences.

Dr. Martin Friedlander, M.D. and Ph.D. is a practicing ophthalmologist at TSRI. Along with his team he is dedicated to research, understanding, treating and finding a cure for retinal degenerative conditions such as Retinitis Pigmentosa (RP) and Macular Degeneration (MD) with a strong emphasis on adult stem cell research. They have made great strides in the field and continue to do so with your generous support.

Please join us for a fun filled day and help us win this fight for a cure.
