

Effective Communication for the Research Lab

Anne Busse, Certified Leadership Coach
The Leadership Coaching Group

Wednesday, August 26, 2009
2:30pm - 4:30pm

HR Training Room

****RSVP Required:** <http://hris.scripps.edu/training/>

*Success in the lab depends upon your ability to communicate effectively.
Get answers to these questions and more:*

- What makes communication effective?
- When should you speak up? When should you hold your tongue?
- How can modifying your communication style improve difficult relationships?
- What is a complete request? How can knowing the components of a complete request transform your conversations?
- What do you truly know and what are you assuming? You can tell the difference in your science, but can you in your lab relationships?

Anne Busse, an ICF certified coach, is a graduate of the leadership coaching program at Georgetown University. Anne is trained as a scientist and received her MS in biology from the University of California, San Diego. She incorporates her scientific experience into coaching with her understanding of the neurobiology of change. Together, Anne and her clients design "experiments" to challenge and support them as they develop into stronger leaders.
