## **US-UK Seminar on Regenerative Medicine**

**Overcoming Commercial Barriers &  
Exploring Collaborative Opportunities**

**Register Now!**

You are invited to attend the 2010  
**US - UK Regenerative Medicine  
Workshop & Networking Event**  
27 July 2010 in San Diego, CA

The British Consulate-General in Los Angeles and the UK HealthTech & Medicines Knowledge Transfer Network (KTN) are hosting a seminar to highlight key developments in the field of Regenerative Medicine and identify how the UK and the US can work together to advance technologies and build on world-leading expertise.

The seminar and panel discussion will address four key themes of importance to the Regenerative Medicine industry -- from both UK and US perspectives -- which will focus on identifying common ground, differences, challenges and the impact on the industry:

- Funding and collaboration
- Standards
- Reimbursement
- Regulation

The seminar will identify potential routes for resolution and identify opportunities on future trends and issues where collaborative R&D is required. Through this seminar and networking reception, you will have the opportunity to share best practice, gain insight from a global perspective, and build your professional network to bridge the gap between Southern California and the UK.

**When:**

Wednesday, July 27, 2010

9:00 AM - 2:00 PM
