

North Coast Corridor
A better environment for the future

I-5/Genesee Avenue Interchange Project

SANDAG

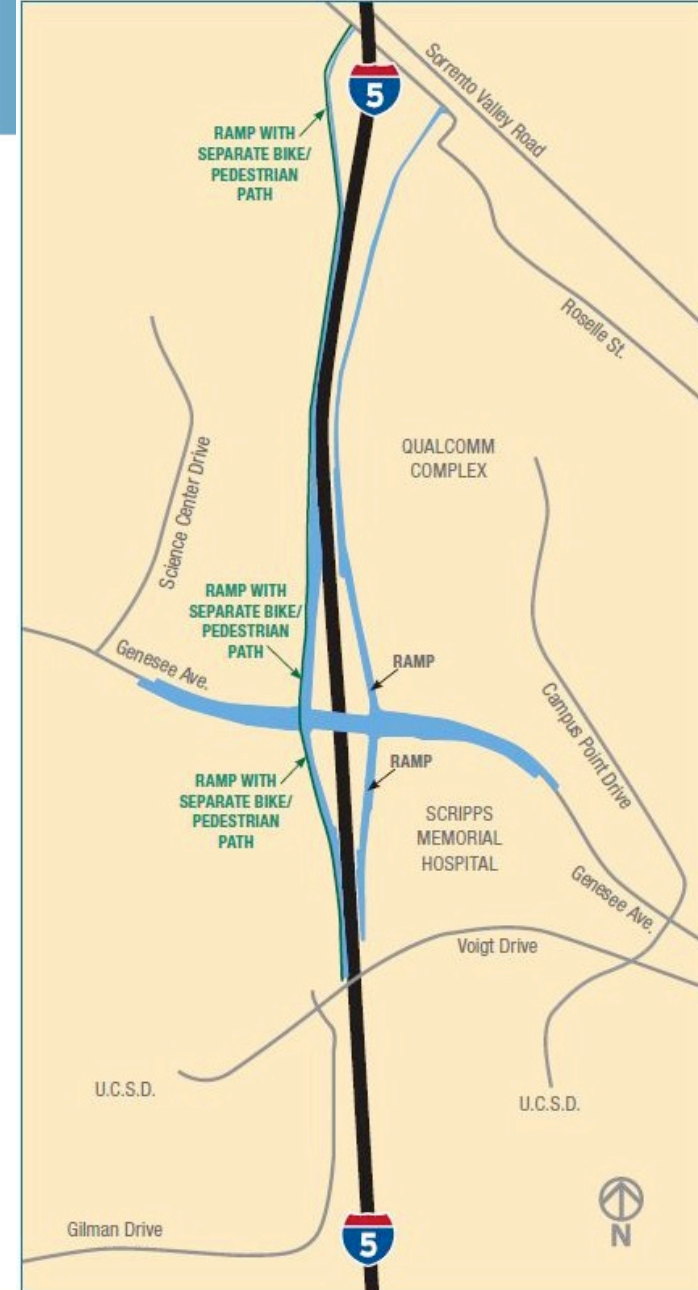

TransNet

KeepSanDiegoMoving.com

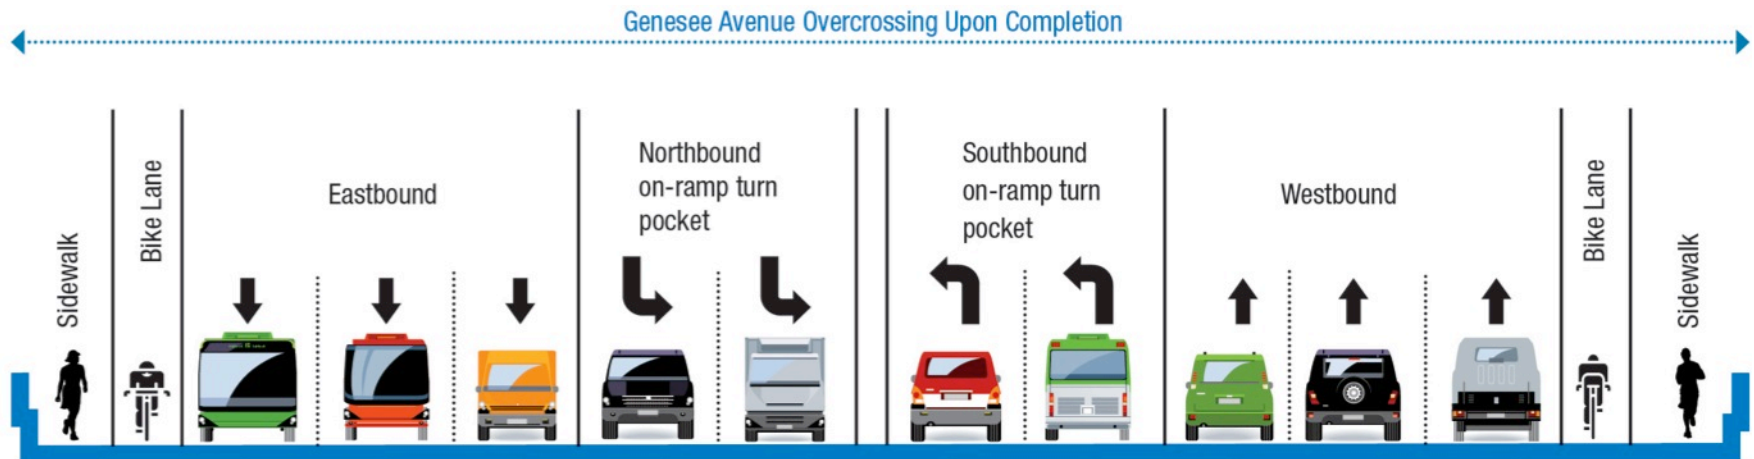

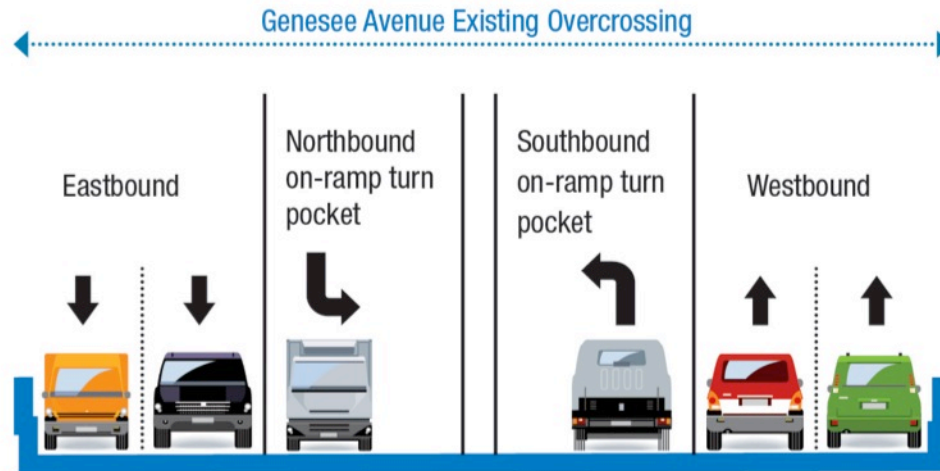

Project Purpose

- Improve east and west traffic flow on Genesee Ave.
- Enhance access to and from I-5
- Replace and widen existing Genesee Ave. overcrossing
- Construct new, separated bike facility west of I-5 linking Sorrento Valley train station with UCSD and area businesses
- Accommodate local and regional employment and population growth
- Accommodate future carpool lanes on I-5

New Bridge Cross-Section

Convert the existing six lane overcrossing into 10 lanes

New Bridge Cross-Section

Bridge Simulation

Sorrento Valley to UCSD Area Bike Path

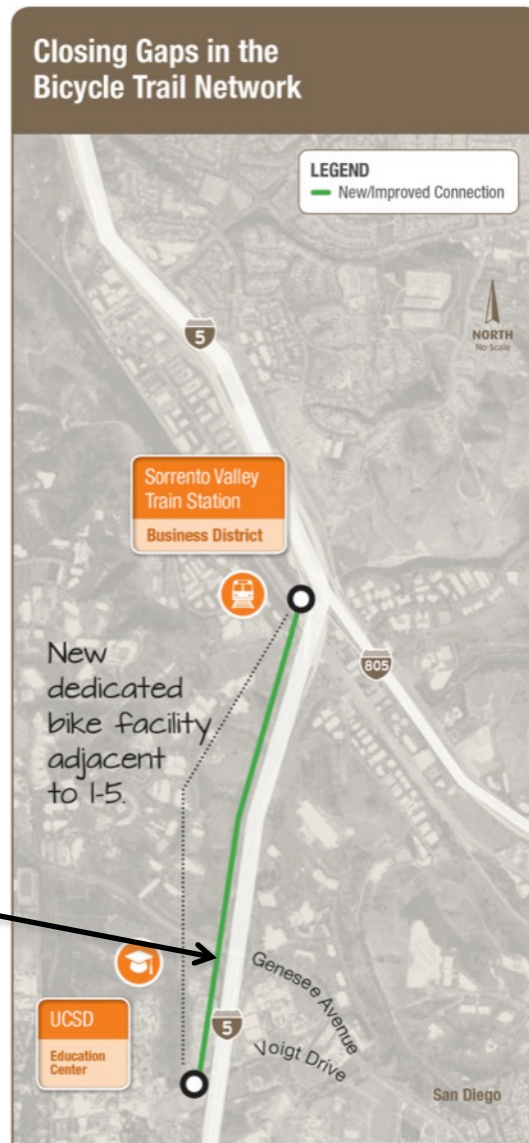

A new, separated bike path on the west side of I-5 will connect the Sorrento Valley train station & the UCSD area

Currently, cyclists must use freeway shoulder to travel from Sorrento Valley to UCSD.

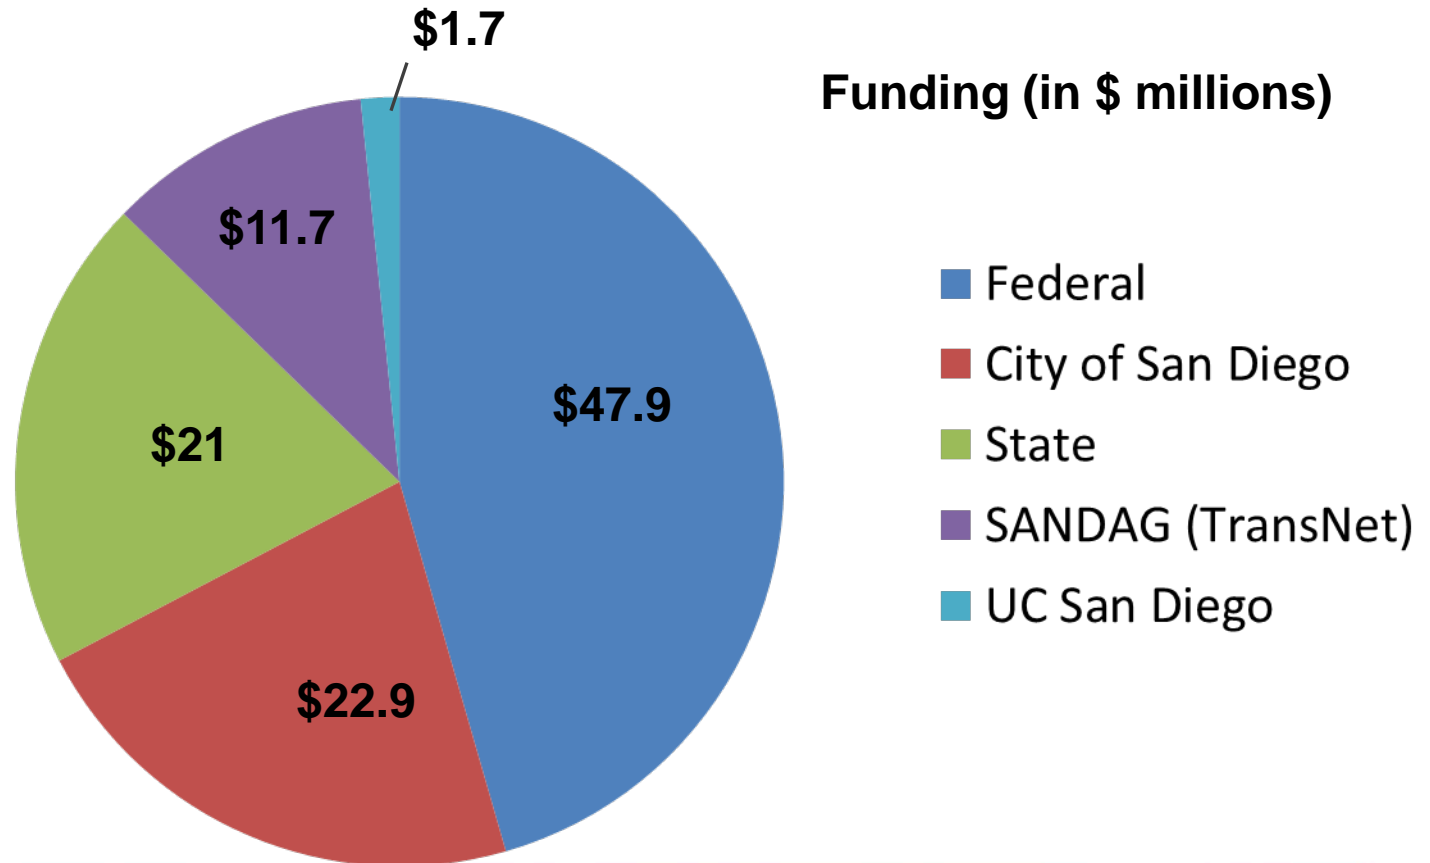

The new bike facility will allow bicyclists to travel in both directions from Roselle Street to Voigt Drive separated from vehicles.

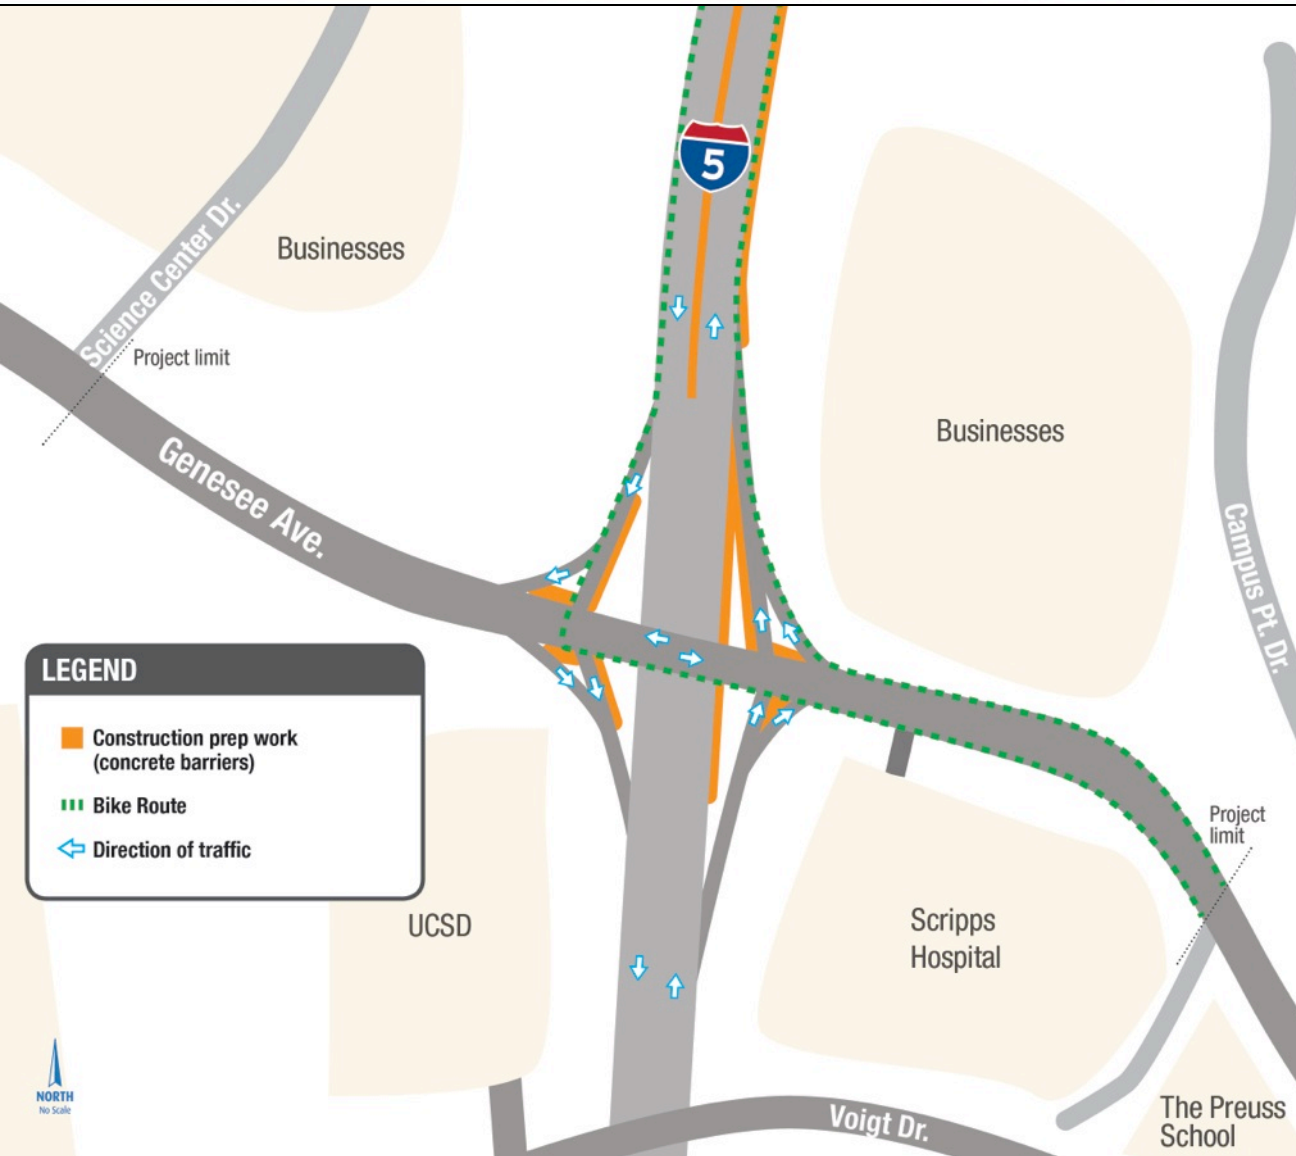

Project Schedule and Funding

- Construction begins in January 2015
- Open to traffic in September 2017

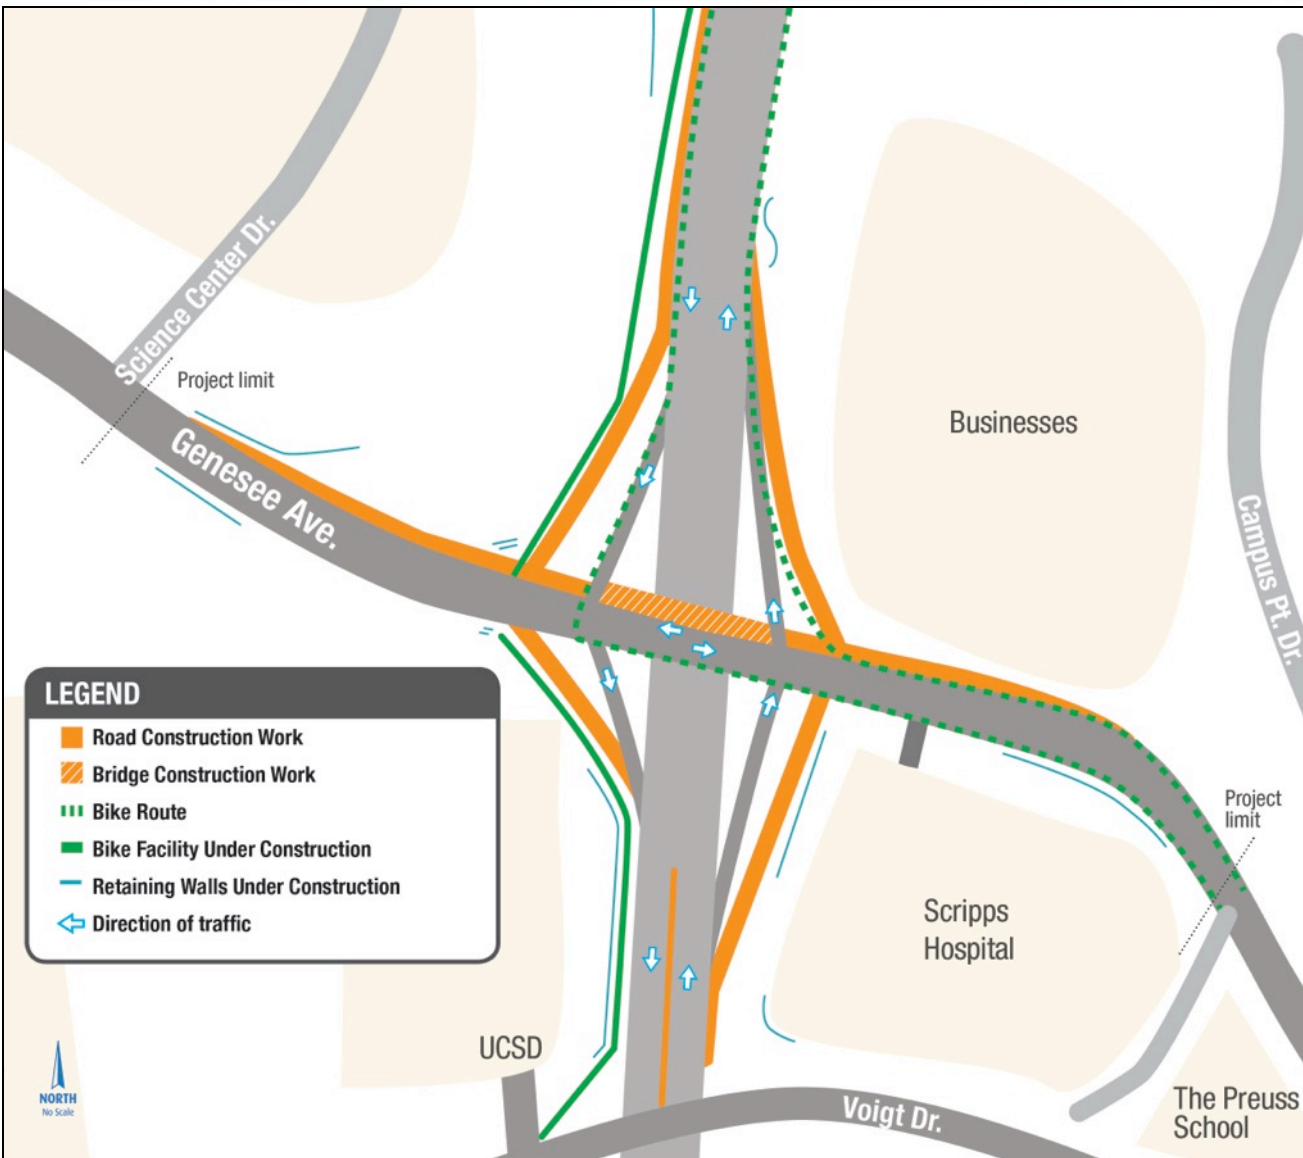

Project Timeline – Stage 1 (3 weeks)

What to expect this stage:

- Intermittent traffic delays but no lane closures
- No pedestrian access within project limits
- Bike access maintained via I-5 shoulder
- Placement of concrete barriers for construction preparation

Project Timeline – Stage 2 (16 months)

What to expect this stage:

- Intermittent traffic delays, overnight lane closures as needed
- Genesee Ave. widening
- Genesee Ave. bridge construction (north side of bridge)
- Retaining wall construction
- Bike access maintained via I-5 shoulder
- No pedestrian access within project limits
- Bike facility construction west of I-5

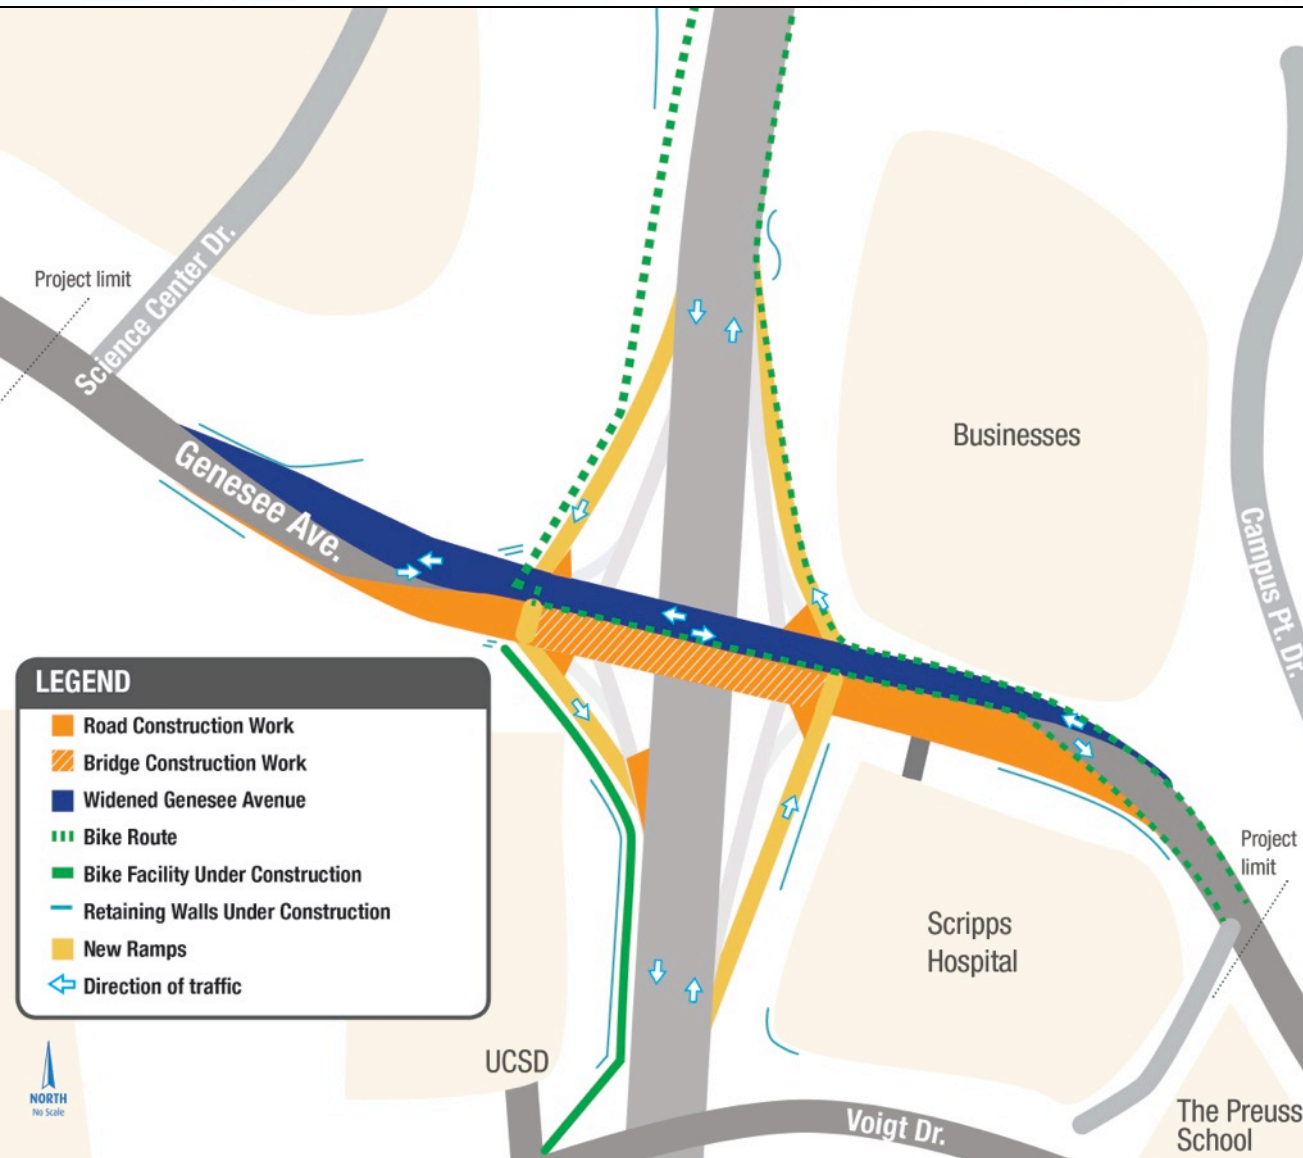

Project Timeline – Stage 3 (9 days)

What to expect this stage:

- Median work on Genesee Ave.
- Traffic on Genesee Ave. bridge shifts to new north side of bridge
- Genesee Ave. reduced to two lanes within project limits
- I-5/Genesee Ave. on/off ramp weekend closures
- No pedestrian access within project limits
- No bike access during on/off ramp weekend closures
- Retaining wall construction

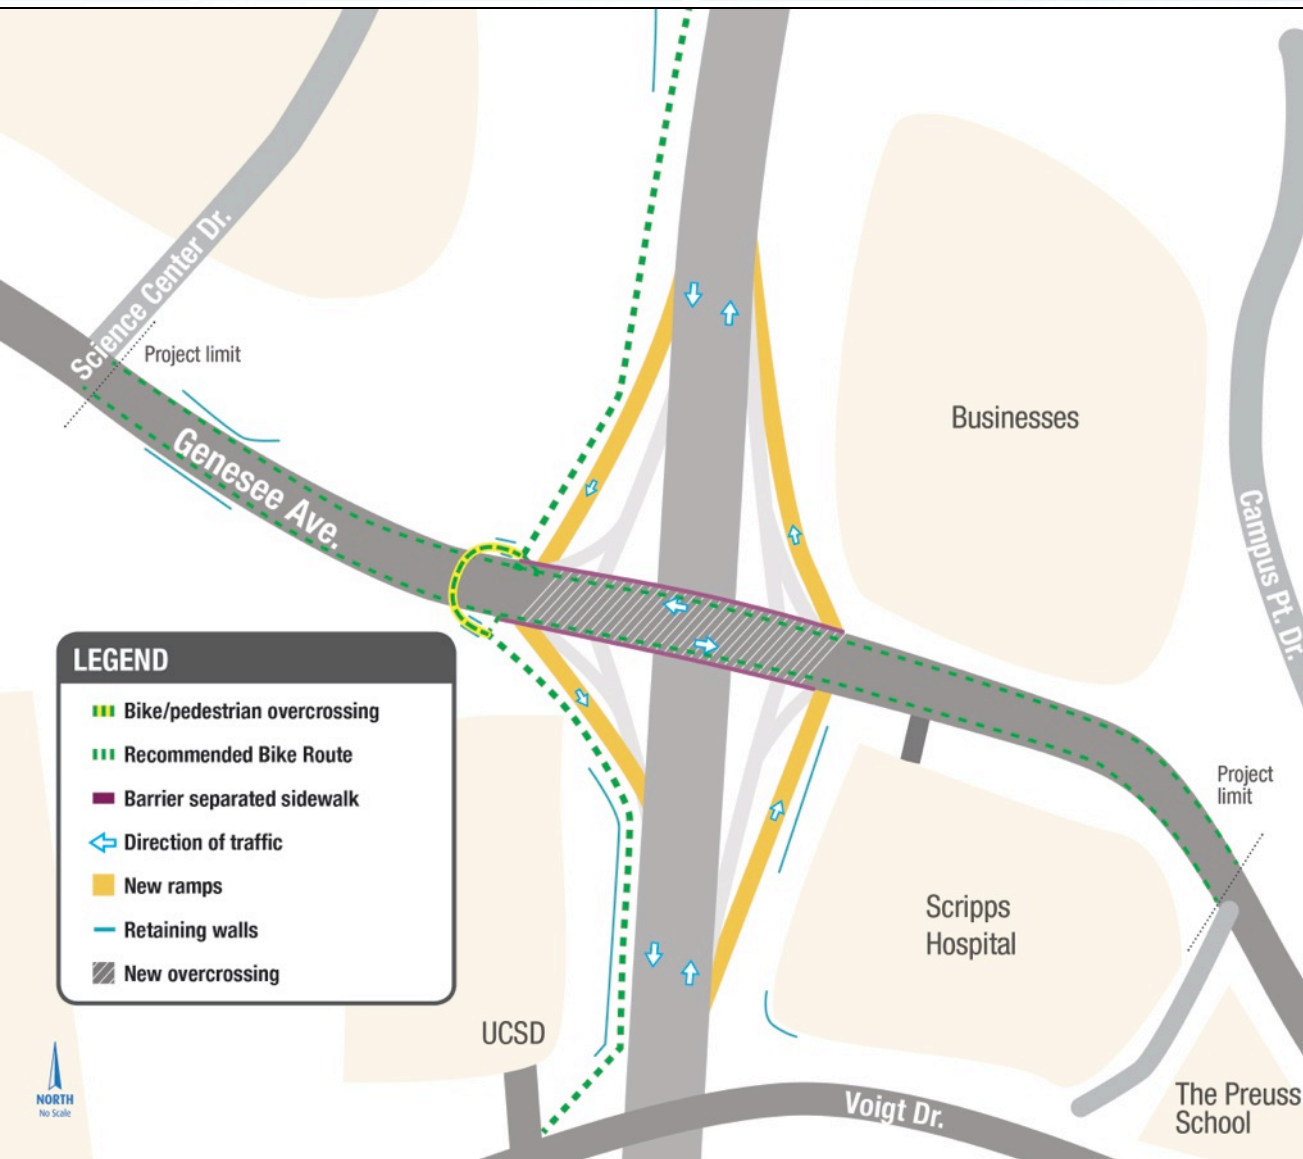

Project Timeline – Stage 4 (Approx. 14 months)

What to expect this stage:

- Intermittent traffic delays, overnight lane closures as needed
- No pedestrian access within project limits
- Northbound bike access maintained via I-5 shoulder
- Southbound bike access available via new bike facility
- Retaining wall construction
- Genesee Ave. bridge construction
- Genesee Ave. widening

Project Timeline – Stage 5 (4 months)

What to expect this stage:

- Construction of bike/pedestrian overcrossing
- Final re-striping of new Genesee Ave. bridge
- Project completion!

What to Expect During Construction

- Regular traffic operations
- The majority of lane closures will take place overnight
- Access points to nearby hospitals will be maintained throughout construction
- Bike access during construction will be maintained on the I-5 shoulder
